

Gurjar Siddhant Begraj

CYBERSECURITY GRADUATE · FULL-STACK SOFTWARE ENGINEER

Gautam Budh Nagar, Uttar Pradesh, India | +91 9321591561 | siddhantgurjar2005@gmail.com | siddhantdev.me | github.com/SiddhantisDead
| linkedin.com/in/siddhant-begraj

PROFESSIONAL SUMMARY

Cybersecurity-focused Computer Science graduate (Galgotias University, 2026) with hands-on full-stack engineering experience shipping production systems — from a live e-commerce platform for a wholesale/retail catalog business to an AI-driven resume-screening tool deployed on the Cloudflare edge network. Comfortable across the stack: React/TypeScript interfaces, systems-level C++, relational data modeling, and Linux-based development workflows. Seeking an entry-level cybersecurity role that pairs secure software engineering fundamentals with a demonstrated ability to design, build, and ship real products.

EDUCATION

Galgotias University — Bachelor of Science, Computer Science (Specialization: Cyber Security) Greater Noida, India

Graduating 2026 — final semester complete, result awaited

TECHNICAL SKILLS

Languages & Frameworks: C++, TypeScript, JavaScript, React, Vite, Next.js, Qt6, shadcn/ui

Backend, Data & Cloud: Cloudflare Workers, Drizzle ORM, relational data modeling

Systems, OS & Tooling: Linux, Unix process/shell programming (C++), CMake, GoogleTest, Git/GitHub, GitHub Actions (CI/CD), ESLint, Prettier

Currently Learning: Python, Ruby, WebGPU, Reverse Engineering

SELECTED PROJECTS

Murtiwallah — Full-Stack E-Commerce & Wholesale Platform

murtiwallah.com

Next.js, React, TypeScript, Supabase, Vercel

- Built and deployed a full-stack commerce platform for a wholesale/retail catalog business using Next.js, Supabase, and Vercel.
- Designed a dual-channel model separating the public retail storefront from an authenticated wholesale dealer portal with tiered MOQ pricing and GST-compliant billing.
- Built cart, wishlist, search, and order-tracking flows alongside an internal admin console for catalog and order management.

Sieve — AI-Powered Resume Screening Platform

raven-resume-smoky.vercel.app/screen | github.com/SiddhantisDead/raven-resume

React, TypeScript, Vite, Cloudflare Workers, Drizzle ORM

- Engineered a full-stack TypeScript application for automated resume screening, deployed as a Cloudflare Worker for low-latency edge execution.
- Modeled and queried application data with Drizzle ORM, and built a consistent interface on shadcn/ui components.
- Enforced code quality with ESLint and Prettier, backed by a GitHub Actions CI pipeline running on every push.

Smart Quiz Challenge — Timed Quiz Engine

github.com/SiddhantisDead/smart-quiz-challenge

C++17, Qt6, CMake, GoogleTest

- Architected a frontend-agnostic quiz engine in C++17, decoupling core logic (parsing, filtering, scoring) from a Qt6 desktop GUI and a separate terminal client.
- Implemented time-bonus scoring, streak tracking, and custom QPainter-rendered analytics, including an accuracy chart and a per-question timing graph.
- Validated engine correctness with a GoogleTest suite run automatically via a GitHub Actions CI workflow on every commit.

ACHIEVEMENTS

[Add hackathon placements, competition results, or CTF rankings here.]

CERTIFICATIONS

[Add certifications as completed — e.g. CompTIA Security+, CEH, Cisco CCNA, or AWS Certified Cloud Practitioner.]

LANGUAGES

English · Hindi · Marathi
