

Gurjar Siddhant Begraj

SOC ANALYST · DETECTION ENGINEERING · CYBERSECURITY

Gautam Budh Nagar, Uttar Pradesh, India | +91 9321591561 | siddhantgurjar2005@gmail.com | siddhantdev.me | github.com/SiddhantisDead

PROFESSIONAL SUMMARY

Cyber Security specialisation Computer Science graduate (Galgotias University, 2026) who builds the tooling most entry-level candidates only study. Designed and shipped SOCSHield, a working SOC platform with a custom Sigma rule compiler, YARA file scanning, brute-force correlation, and MITRE ATT&CK mapping — alongside 22 completed hands-on reverse engineering levels on BreachLab. Completed Cisco Networking Academy coursework in networking and cybersecurity fundamentals, fluent in Python and Linux, and equally comfortable reading a detection rule or the application code that generated the log. Seeking an SOC L1 / detection engineering role.

EXPERIENCE

Ethical Hacking Virtual Intern – AICTE & EduSkills (Ministry of Education)

Oct – Dec 2025

- Completed a 10-week structured ethical hacking internship under the AICTE National Internship Portal, graded **O (Outstanding)** – the top band.

SECURITY SKILLS

Detection & Threat Analysis: Sigma rule authoring & compilation, YARA signatures, MITRE ATT&CK mapping, SOC alert triage, incident management, brute-force / anomaly correlation, log parsing (Windows Event, Linux syslog/auth, Apache, firewall, DNS)

Offensive & Analysis: Reverse engineering, binary analysis, ethical hacking fundamentals, vulnerability identification

Networking & Systems: TCP/IP, routing & switching (CCNA), Linux administration, Unix process & shell programming (C++), Docker

Security Engineering: Python, FastAPI, JWT role-based auth, PostgreSQL, REST API design, React/TypeScript analyst tooling, Git & GitHub Actions CI

SECURITY PROJECTS

SOCShield – SOC Analyst Simulation Platform

socshield-rose.vercel.app | github.com/SiddhantisDead/socshield

FastAPI, Python, pySigma, YARA, React, TypeScript, PostgreSQL, Docker

- Built an end-to-end SOC platform that ingests Windows, Linux, Apache, firewall and DNS logs through custom parsers, runs them against a detection pipeline, and surfaces prioritised alerts in an analyst console with severity breakdowns and a live MITRE ATT&CK heatmap.
- Engineered the detection engine on a custom pySigma backend that compiles Sigma rules into in-process Python predicates — full AND/OR/NOT logic, wildcards, regex and CIDR matching; authored 10 detection rules covering credential dumping, persistence, encoded PowerShell, malicious macros, SQLi and C2-like DNS.
- Added a sliding-window correlation pass for brute-force login detection and real yara-python file scanning for malware artefacts; implemented JWT role-based access control and incident lifecycle management, deployed to production on Vercel, Render and Neon PostgreSQL.

BreachLab – Reverse Engineering Track

22 levels completed

- Completed 22 hands-on reverse engineering challenges: binary inspection, control-flow analysis, and defeating obfuscation to recover program logic and hard-coded secrets.

Sieve – AI Resume Screening Platform

raven-resume-smoky.vercel.app/screen

TypeScript, React, Cloudflare Workers, Drizzle ORM

- Engineered a full-stack TypeScript application for automated resume screening, deployed as a Cloudflare Worker for low-latency edge execution, with data modeled in Drizzle ORM.

ADDITIONAL ENGINEERING WORK

Murtiwallah (murtiwallah.com) — Live Next.js commerce platform with an authenticated wholesale dealer portal, role-separated access, tiered pricing and GST-compliant billing, on Supabase and Vercel.

Smart Quiz Challenge — Frontend-agnostic C++17 engine with a Qt6 GUI and terminal client, tested by a GoogleTest suite running in GitHub Actions CI.

CERTIFICATIONS

Cisco Networking Academy: CCNA — Introduction to Networks (2025) · Introduction to Cybersecurity (2025) · Introduction to IoT & Digital Transformation (2026)

Security: Learn Ethical Hacking From Scratch (Udemy) · BreachLab — 22 hands-on reverse engineering levels

Cloud: AWS Cloud Practitioner (Self-Paced) · AWS Solutions Architect – Associate (Self-Paced)

EDUCATION

Galgotias University — B.Sc. Computer Science (Specialization: Cyber Security)

Greater Noida, India · 2026

Languages: English · Hindi · Marathi
